PROFILE

A passionate and enthusiastic software engineer with hands-on industry experience in real-world software development. Skilled in designing, developing, and maintaining software solutions with a strong foundation in programming, problem-solving, and collaborative teamwork. Eager to contribute to innovative projects, learn from experienced professionals, and grow as a full-stack or backend developer in a dynamic tech environment.

SKILLS

- JavaScript
- Python
- Java
- C++
- React.js
- MySQL
- PostgreSQL
- HTML / CSS
- GitHub
- API Development & Integration
- Object-Oriented Programming (OOP)
- Communication
- Problem-solving
- Teamwork
- Quick learning

PROFESSIONAL EXPERIENCE

IMPLANT TRAINEE

ROCKLAND DISTILLERIES (PVT) LTD

(July 2023 – Jan 2024)

- Prepared daily, weekly, and monthly performance reports using Microsoft Excel and Google Sheets
- Identified and corrected data inconsistencies through validation and basic MySQL queries
- Supported backend operations and maintained technical documentation using Microsoft Word
- Managed version-controlled documentation and queries using GitHub
- Delivered reports and data to stakeholders in compliance with internal policies
- Contributed to process improvements by identifying reporting inefficiencies

SOFTWARE ENGINEER INTERN

BRICKBLOC DEVELOPMENTS (PVT) LTD

(Jan 2024 – Nov 2024)

- Developed and maintained internal web application features using React
- Assisted with FastAPI integration and basic server-side and database operations
- Implemented frontend-backend data integration and validation across application components
- Wrote modular, maintainable code following internal standards and documentation practices
- Used GitHub for version control and team collaboration
- Collaborated with UI/UX teams and supported third-party API integrations
- Assisted in testing, bug fixing, and deployment preparation activities

FULLSTACK DEVELOPER

AccuTech (PVT) Ltd

(November 2025 – April 2026)

- Developed and maintained a website for a tour agency using WordPress
- Modified website according to client feedback and worked on e-commerce for client website using woocommerce.
- Created reports of website and website plan for the client using word.

CURRICULAR ACTIVITIES

Code sprint *An IEEE event*

Participated in code sprint with SDGP team.

Stage craft *An IIT event.*

Competed in an event called Stage Craft with dance team.

EDUCATION

Software Engineering (Second Upper)

*B.Eng. in Software Engineering
Informatics Institute of Technology*

2021 – 2025 (November)

Advance Level

Colombo Hindu College

2012 – 2019

PROJECTS

Individual Java Application - *Excel sheet format converter*

Developed a Java application for Rockland that converts and standardizes Excel sheet formats. The tool efficiently processes large Excel files, automating data formatting to improve accuracy and reduce manual effort. Utilized Java libraries such as Apache POI for Excel manipulation.

Software Development Group Project - *Baby eye tracking system*

Developed a machine learning-based application to track baby eye movements using screen-based visual stimuli. Aimed at early detection of vision-related issues in infants.

Individual IoT Project - *Raspberry Pi Sensor Data Logger*

Connected a BME280 sensor to a Raspberry Pi Pico W to collect temperature, humidity, and pressure data. Developed Python scripts to display readings, host them on a local web server, and log them to Google Sheets with timestamped entries for visualization.

Final Year Project - *Try to improve disease NER accuracy using synonyms of disease names*

Developed a browser extension for real-time biomedical text understanding. Integrated BioBERT and contrastive learning into a unified model for disease NER and synonym generalization. Designed for low-latency deployment using biomedical datasets like BC5CDR and NCBI Disease.

Algorithm - *Developed a simple algorithm to detect graph type*

Developed a Java program to check if a directed graph is acyclic. Implemented a custom graph data structure and a sink elimination algorithm. Included input parsing and cycle detection for non-acyclic graphs.
